

## VA-V9-170 (S14) Resilient-Seated Gate Valve AWWA C515 GAER® PN16

Gaer® flanged resilient-seated gate valve for water distribution. Can be operated by handwheel and square cap. Possibility of motorization. Its configuration guarantees complete and directional tightness in its entire range of pressures, with smooth movement of the shaft during its entire travel. Design and production of the valve according to the international standards complying with the strictest quality controls.

### TECHNICAL FEATURES

- Working pressure: PN16.
- Working temperature: 0°C to 80°C.
- Range of dimensions: DN50 to DN300.
- Coating: Epoxy resin according to AWWA C515.
- \*Other materials and specifications on request.

### STANDARDS

- **Design:** AWWA C515.
- **Flanges:** ASME B16.5 / CL150.
- **Distance between sides:** ASME B16.10.
- **Trials and tests:** AWWA C515 / API 598.
- **Coating:** AWWA C550.
- WRAS certified for drinking water**

### COMPONENTS, MATERIALS AND SPECIFICATIONS

Component	Material	Specification
1	Body	Ductile iron ASTM A536 64-45-12 (GGG50)
2	Disc	Ductile iron + EPDM ASTM A536 64-45-12 (GGG50)
3	Cap seal	NBR ISO 4633
4	Shaft	Stainless steel AISI 420
5	Cap	Ductile iron ASTM A536 64-45-12 (GGG50)
6	Thrust washer	Brass CuZn39Pb1
7	Thrust gland	Brass CuZn39Pb1
8	Gasket	Ductile iron ASTM A536 64-45-12 (GGG50)
9	Handwheel / Square cap	Ductile iron ASTM A536 64-45-12 (GGG50)
10	Screw	Stainless steel AISI 304 (A2)
11	Washers	Stainless steel AISI 304 (A2)
12	Dust cap	NBR ISO 4633
13	Ring seal	NBR ISO 4633
14	Ring seal	NBR ISO 4633
15	Ring seal	NBR ISO 4633
16	Ring seal	NBR ISO 4633
17	Ring seal	NBR ISO 4633
	Shaft lock nut	Brass CuZn39Pb1

# VA-V9-170 (S14) Resilient-Seated Gate Valve AWWA C515 GAER® PN16
